

We welcome Canada's ratification of the Paris Agreement as a milestone in the federal government's re-engagement on climate change. Cities and communities are ready to help turn the optimism of Paris into concrete action.

When it comes to climate change, we must think global and act local. Cities and communities have direct or indirect influence over more than half of Canada's greenhouse gas emissions and are leading innovations to reduce emissions.

Through focusing on multi-sustainability, leadership, our Integrated Municipal Sustainability Plan and participation in the Partners for Climate Change Program we will follow up on our commitments and policies for the overall improvement to the physical, social, environmental and economic well-being of our City for a strong sustainable future.

The City of Corner Brook Local Actions

- Corner Brook is one of the first municipalities in Atlantic Canada to incorporate Integrated Community Sustainable Planning (ICSP) measures into a municipal planning policy and regulatory framework to result in an Integrated Municipal Sustainability Plan (IMSP)
- Municipal Partners in Climate Change Action Planning
- Active in Flood Risk Mapping-Climate Change
- Municipal Partner for Climate Protection (PCP)- Completed Phases 1 and 2
- Certified Silver LEED building and Green design of our City Hall Complex-we were the first in our province.
- Invested in a heat recovery system that extracts heat from the ice, stores it; and then pumps it back into the building when needed at the Civic Centre
- Installed a Heat Recovery system at the Curling Risk to Reduce energy usage
- Partnered with the Corner Brook Museum and Archives to convert part of City Hall Complex from oil heat to an Ecodan Air Source Heat Pump
- We are using the District Energy Feasibility Study key document to work towards redeveloping the downtown
- The first municipality in the province to offer curbside recycling pickup of paper and cardboard
- Hybrid vehicles as a part of our Municipal Fleet
- Elaborate network of walking trails which we are expanding
- Bike Lane - Share The Road Program
- Smaller Public Transportation Buses
- Curbside Fall Leaf Collection
- Honeywell Energy Audit and Energy Reduction Plan completed for the Civic Centre
- LED Energy-Efficient traffic Lights which reduce energy use
- Blue Bag & Fiber Bag Recycling Program
